

IN THE SPECIFICATION:

Page 1, lines 14-16, cancel "The invention also related to a method of producing such a sensor, as well as to a method of mounting such a sensor to a circuit board."

Page 3, cancel lines 14-19.

Page 4, cancel lines 11-21.

Page 17, lines 13-18, cancel "Such temperature sensors can be produced by preparing many temperature sensing elements and a lead frame with a linearly elongated base part and pairs of planar lead parts extending perpendicularly from the base part, twisting these planar lead parts and inserting the temperature sensing elements between mutually facing pairs of top end parts of these planar lead parts and cutting them to separate them from the base part."

IN THE CLAIMS:

Cancel claims 15-20.

REMARKS

The application is herein preliminarily amended because the nature of the application has changed due to the instant election made herein in response to the requirement for restriction.

The Examiner is requested to note that the undersigned attorney of record now has a new address and new telephone and FAX numbers.

Respectfully submitted,

By:
